FULL STACK WEB DEVELOPER SUMMARY

I'm a full stack developer with experience deploying static and dynamic webpages, creating Single Page Full Stack Web Applications, writing SQL commands to perform Create, Read, Update and Delete commands, and creating RESTful APIs utilizing JSON as a data format. I love finding solutions to complex problems and always strive to continue learning.

PROJECTS

HAPPY HOUR PAL | GitHub Repo
FULL STACK DEVELOPER
- A mobile web app that helps users find great happy hour deals nearby or in a specific area. Users can see existing deals or login to add deals to the database.
- I worked on a team and I was responsible for creating React components and pages and achieving functionality with user authentication.
- Technologies used: CSS, JavaScript, JQuery, JSX, React, MongoDB, Reactstrap, Google Places API, Google Maps API, Passport

REACT MEMORY GAME | GitHub Repo
FRONT END DEVELOPER
- A space-cat themed memory game created with React.
- Technologies used: HTML, CSS, JavaScript, React, JQuery, Bootstrap, Heroku

DOKO | GitHub Repo
FRONT END DEVELOPER
- A relocation web app designed to be a one-stop-shop to help the user find a new place to live. The user can search for jobs by title or location and then see information and events for the city n which the job was located.
- I worked on a team and was responsible for incorporating the Jooble API, as well as writing the Javascript to display the job listings, events, and city stats. Also combined Javascript files to reduce redundant code.
- Technologies used: HTML, CSS, JavaScript, JQuery, AJAX, Express, Bootstrap, JoobleAPI, Eventfyl API, Numbeo API

GIPHY API | GitHub Repo
FRONT END DEVELOPER
- A web app that incorporates the Giphy API to search for gifs from the television show 'The Office'. The user can choose from existing characters or add a new character.
- Technologies used: HTML, CSS, JavaScript, JQuery, Giphy API, AJAX, Bootstrap, Express
